CAREER OBJECTIVE

Computer Science student with a strong foundation in Python, Java, C, SQL, and web technologies. Hands-on experience in machine learning, deep learning, RAG systems, and Docker-based application deployment through academic projects. Familiar with developing, testing, and deploying software applications using tools such as VS Code, Git, GitHub, and Flask. Seeking an entry-level opportunity to apply technical skills and gain practical industry experience.

EDUCATION

Bahubali College of Engineering, Shravanabelagola

Bachelor of Engineering in Computer Science and Engineering | VTU University 2023

– Present | Expected Graduation:2027

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, C

Data & Analytics: Pandas, NumPy, Data Cleaning, Data Analysis, Data Visualization, MS Excel

Databases: MySQL, SQL

AI & Machine Learning: Machine Learning, Deep Learning, CNN, ResNet18, Artificial Intelligence, Agentic AI

Web & Frameworks: HTML, CSS, JavaScript, Flask, PyTorch

Tools & Platforms: Git, GitHub, Power BI, Tableau, Visual Studio Code, IBM Cloud, IBM SkillsBuild

API Technologies: APIs, Rest APIs

INTERNSHIP

Artificial Intelligence Intern – Codec Technologies Pvt. Ltd. (18 Aug 2026 – 18 Sep 2026)

- Completed a 1-month AICTE & ICAC approved internship program in Artificial Intelligence.
- Internship conducted by Codec Technologies Pvt. Ltd.; certificate awarded in recognition of completion.

PROJECTS

Identification of Bird Species in Images Using Deep Learning (Jan 2026)

- Designed and implemented an image-based bird species identification system using deep learning.
- Developed an image classification model using ResNet18 and PyTorch.
- Built a Flask-based web interface for image upload and bird species prediction.
- Applied image preprocessing and transformation techniques for model prediction.

Parkinson's Disease Detection Using Voice Analysis and Machine Learning (Sep 2025 – Dec 2025)

- Developed a voice-based Parkinson's disease detection system using machine learning.
- Implemented an SVM classifier to classify voice recordings as healthy or Parkinson's-affected.
- Extracted acoustic features including jitter, shimmer, HNR, and fundamental frequency.
- Applied data preprocessing, feature scaling, and model evaluation techniques.

CERTIFICATIONS

- Getting Started with Artificial Intelligence - IBM SkillsBuild (June 2026)
- Blockchain An Introduction – VOIS Tech (Aug 2026)
- 6-Day STTP: Next-Gen Industry Oriented Technologies in Networking – Bahubali College of Engineering (Feb 2026)
- Python for beginners – Simplilearn SkillUp (Jan 2026)
- Data Visualization – VOIS Tech (Sep 2026)

TRAINING

- 6-day online STTP on Next-Gen Industry Oriented Technologies in Networking, Bahubali College of Engineering.

ADDITIONAL SKILLS

Soft Skills: Leadership | Problem Solving | Team Collaboration | Communication | Adaptability

Languages: English – Professional | Kannada – Native
